

12 beam splitters one large and one small

RF Power Splitters/Dividers/Combiners 2-Way, 3-way, 4-way, 6-way, 8-way, 10-way, 12-way, 16-way and up to 24-way models for 50 Ohm and 75 Ohm systems from DC to 67 GHz!

When working with lasers, it is often necessary to split a laser beam into two or more defined partial beams. There are a variety of beam splitters for these applications, with different advantages and ...

Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back surface is wedged and AR coated in ...

Standard Beamsplitters, which split incident light by a specified ratio that is independent of wavelength or polarization state, are ideal for illumination subassemblies or as one way mirrors.

Newport offers a wide variety of Beamsplitters in various shapes. Circular beamsplitters, plate beamsplitters and cube beamsplitters can be purchased for polarizing or non polarizing beamsplitting ...

Our expert technical staff will guide you through the many options we offer, ranging from custom split ratios, unique materials, and custom coatings to unusually large or small dimensions.

There are different types of beam splitters; the most important are plate and cube beam splitters as shown in the figure below. Beam splitters are required for various interferometers, autocorrelators, ...

Beam splitters are devices for splitting a laser beam into two or more beams. There are different types, including polarizing and non-polarizing versions.

Large beam size, multi mirror optical set up with small power light source and supports high power laser light splitting. Polarization at 45 degree (AOI) or circle polarization light with no power loss detected. ...

Custom beam splitters for lasers, photonics, and imaging. Plate, cube, polarizing, and dichroic tailored to your wavelength and specs.
