The OptiX 155/622H can access multiple types of services and can be used at the access layer of metropolitan area networks (MANs) and local transmission networks to access VIP private lines, ...

The OptiX 155/622H can access multiple types of services and can be used at the ...

The transceiver consists of three sections: a FP laser transmitter, a PIN photodiode integrated with a trans-impedance preamplifier (TIA) and MCU control unit. All modules satisfy class I laser safety ...

The SB2D is a 2xSTM-1 single-fiber bidirectional optical interface board. In the case of the left optical interface, signals are transmitted on the 1550 nm wavelength and received on the 1310 nm wavelength.
