primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end

Energy Statistics Description This data collected is on electricity generation and distribution.

This document was developed by the National Renewable Energy Laboratory with support provided by the Caribbean Center for Renewable Energy and Energy Efficiency.

By combining a baseload of geothermal energy, the historical reliability of its hydroelectric cascade, and the decentralised security of solar micro-grids, the energy sector is undergoing a total metamorphosis.
