

Are fiber optic routers a waste of money

Fiber-optic is the most energy-efficient residential broadband technology available today. Here is what the data actually shows, including the one sustainability angle the industry rarely talks ...

I'm regretting going with frontier fiber optics as well. Not really impressed with the speed and not even able to hook it up to my dish TV because it's not recognized in the Wi-Fi list.

Fiber-optic connections, however, are the newest, and some say best, option of all three. It's fast becoming a go-to internet connection option for both homes and businesses. Here are all of the ...

Overall, the pros and cons of renting or buying your modem and router depend on your internet provider and the amount of money you're willing to spend. I'll explain how to know what's ...

Investing in your own router is not just about saving money; it's about gaining control over your home network. It means unlocking faster speeds, more reliable ...

Looking for a router that would get me 10Gb in, and 10Gb out, I was surprised to find a dearth of actual consumer-grade (aka consumer-priced) and consumer-styled networking gear that ...

Discover the true cost of fiber optic networks, from deployment to long-term ROI. Learn how fiber compares to legacy networks and whether it's the right investment for your business.

Yes, fiber internet is generally worth the investment over cable for most users. Although cable plans can have a lower initial cost, fiber offers superior long-term value through greater ...

Expensive routers, whether they have gaming branding or not, can be fantastic--but they won't fix any underlying problems with your connection. Chances are that if you're unhappy with your ...

Investing in your own router is not just about saving money; it's about gaining control over your home network. It means unlocking faster speeds, more reliable connections, greater customization, and ...

Fiber optic internet significantly outperforms traditional cable by using light to transmit data. This technology provides much higher bandwidth capacity and symmetrical speeds.
