

CE Certified 12-core Fuse Fiber Reinforcement Pad

To prove you're not a bot, solve this simple math problem. The machine translated document is now available for download.

SikaFiber® is the ideal solution for replacing bulky steel rebar or wire mesh reinforcement in concrete slabs, saving time and money in the construction process.

Validated through independent laboratory testing and compliant with ASTM standards and CE certification, PIONEER® technologies deliver reliable performance in fiber reinforced concrete and ...

Datasheet.

Depending on the fiber type and project requirements, this solution improves post-crack load capacity, controls plastic shrinkage cracking, and enhances impact and abrasion resistance.

We stock our most popular high heat refractory products so that you can have them the same day or the next day. Call +1-800-887-5555 to be connected to the distribution center nearest you.

A type of secondary reinforcement consisting of small polypropylene or polyethylene fibers (typically less than 0.12 inch in diameter) that are mixed right into the concrete as a way to reduce plastic shrinkage ...

FORTA-FERRO, which means "strong as steel", is a revolutionary, patented synthetic fiber reinforcement specifically engineered to ...

FORTA is a global leader in reinforcement fiber products, enhancing material performance and long-term durability in concrete, asphalt, and other applications by minimizing cracking and improving ...

Despite its smaller footprint, this pad maintains the same high standards of durability and reliability that define all of our precast concrete products. It's ideal for ...

All FRC transformer pads are further reinforced with #3 rebar and are manufactured with an optional lifting provision and transformer hold-down hardware. The pads are warranted against defects in ...

Commonly used in precast concrete construction, VOSSCO® serves as an economic bearing or bedding pad in applications such as: Box beam or hollow core plank bearing strips

SRS proudly leads the way with American Made carbon fiber strengthening systems that tested to ICC-ES &

CE Certified 12-core Fuse Fiber Reinforcement Pad

AC125 to provide the most reliable technical data. SRS systems are engineered and tested to ...
