

Cold aisle micro-module modification

with simple, efficient, and reliable data center solutions. It's a modular-designed, highly integrated solution which comprises power supply, cooling, rack & structure, cabling and management system ...

The ArcTiv Micro Data Center Aisle System is designed for indoor applications where building modification is restricted. The bespoke system is ideal for edge-computing applications, providing ...

- o High-efficiency integrated power distribution and closed cold and hot aisles, leading in power density and energy efficiency in the industry.
- o Supports various configurations of single-row or double-row ...

Cold aisle containment can be used with or without conventional raised floor cooling. It is easily retrofitted into existing raised floor data centers and works in tandem with the raised floor as well as ...

Intelligent hot/cold aisle containment with fully enclosed design, combined with dual-source air conditioning and anti-condensation systems to effectively handle high-temperature, high-density ...

Our modular systems provide flexible, secure separation between hot and cold aisles or controlled zones to maintain optimal environmental performance.

pure green power supply for data center load. * Fully digital control, flexible and robust. * 7 & 10-inch touch LCD, with IoT functions. * High reliability and environmental adaptability, with protection at the ...

The modular cold aisle system is a core component of the micro-module data center, specially designed to meet the development needs of cloud computing, virtualization, centralization, and high-density ...

The components are organized into modular kits and come with assembly hardware for easy step-by-step installation. Depending on your hot-aisle/cool-aisle needs, you can select from an assortment of ...

Efficient Micro Modular Data Center featuring integrated cooling, energy solutions, and cold aisle containment for optimal performance and scalability.
