

Communication power supply system 200kW

Seamless Integration and Scalability: Our 200kW all-in-one system offers seamless integration of solar panels and LFP battery storage, providing a comprehensive energy solution for your business or ...

V2G enables bidirectional energy flow between electric vehicles and the power grid, allowing electric vehicle owners to charge during off-peak hours and discharge during peak hours to take advantage ...

Zekalabs presents our 200kW, 1200V DC-DC cabinet solution. The unit is bidirectional and can serve in many intricate applications.

A robust 200kW DC power supply with built-in fault protection, surge suppression, and backup compatibility ensures reliable operation even in harsh environmental conditions, ...

A power efficient design is required that supplies both the higher voltage analog circuits and multiple tightly regulated low-voltage supplies for the high-speed digital communications ASICs and FPGAs.

The unit is a bidirectional 200kW / 1050V DC/DC overlapping power converter. As a combined buck/boost air-cooled converter, it can be set up in either charging or discharging mode.

ACME series high-power bidirectional DC power supply uses high-frequency PWM rectification and bidirectional DCDC conversion technology, as well as FPGA digital control ...

Enhance energy efficiency with high-performance 200kw power supply. Designed for reliability and versatility, they offer optimal power management for various applications.

Whether for off-grid power systems, backup emergency power, PV+storage integration or large zero-carbon parks, our products feature advanced thermal management, PCS and EMS integration, ...

The unit is a bidirectional 200kW / 1200V wall or cabinet mountable DC/DC power converter. As a combined buck/boost air-cooled converter, it can be set up in either charging or discharging mode.
