

Core Switch Gigabit Huawei

The Huawei core switch is a high-performance networking solution designed for enterprise data centers and large-scale networks. Engineered for reliability, scalability, and intelligent traffic management, it ...

With multiple industry-leading intellectual properties and patents, Huawei provides more than a hundred switch models in more than 10 series, including access, aggregation, and core switching.

Huawei CloudEngine S5755-H series switches are high-quality gigabit access switches that provide 24 or 48 10/100/1000BASE-T downlink ports, four 25GE plus two 100GE uplink ports, and expansion ...

Huawei eKitEngine S530 series switches (S530 for short) are enhanced fully-managed gigabit switches designed for the small- and medium-sized business (SMB) market.

Huawei Ethernet Switches Turbocharge your enterprise network with high-performance, high-availability for resilient services and simplified management.

The Huawei S5720H series represents a powerful line of gigabit switches designed for enterprise campus core and distribution networks. Based on Huawei's VRP V200 operating system, it blends ...

CloudEngine S12700H series switches are Huawei's next-generation modular core/aggregation switches designed for high-end campus networks in the all-wireless era of Wi-Fi 6/7.

Next-generation high-density Gigabit Ethernet switches, providing 40/100GE uplink ports. Newly launched modular switches tailored for the AI era, providing ultra-high-density port options ranging ...

Gigabit access switches providing all-GE electrical ports. The CloudEngine S5731-S series offers a range of standard gigabit access switches, with all-GE electrical/optical ports and fixed 10 GE uplink ...

Realize wired and wireless convergence from access to core, manage up to 10,240 APs with a single switch, and achieve simplified O& M with unified user authentication.
