

Abstract: We have demonstrated a compact, chip-based system for high-speed polarization-encoded QKD, which utilizes advanced silicon photonics technology and operates at a clock rate of 2.5 GHz.

The US and Cuba have had strained relations for decades, stemming from the island's communist revolution and the disastrous Washington-backed Bay of Pigs invasion in 1961.

Cuba crisis explained: Who holds power, and could Diaz-Canel be replaced? As Cuba faces one of the worst humanitarian crises in its history, questions have emerged about the island's ...

We chart the generational trends in silicon photonics technology, drawing parallels from the generational definitions of CMOS technology. We identify the crucial challenges that must be...

Satellite imagery and open-source information assessed by CSIS offers an unprecedented look at four active sites in Cuba capable of conducting electronic surveillance operations. These four ...

Cuba Dem representative admits to working with Mexico to sneak oil into Cuba, despite blockade Conservative accounts accused the Washington Democrat of "conspiring against the U.S." ...

The deepening economic crisis that has gripped Cuba for the past six years -- intensified by the energy embargo enacted under U.S. President Donald Trump -- continues to disproportionately affect the ...

Cuba's government did not reply to a request for comment on the discrepancy in output. But fuel and electricity generation ...

Innovative technology stack for high energy efficiency The patented technology stack features silicon and silicon nitride wave guides with very low sub-dB loss, as well as a low-loss edge coupling capability.

China urged Washington on Tuesday to immediately end its embargo and sanctions on Cuba, saying the expanded measures were "illegal" and "seriously violated" the norms of ...

Cuba's government did not reply to a request for comment on the discrepancy in output. But fuel and electricity generation shortages have affected industry across the island, crippling...

Cuban Foreign Minister Bruno Rodriguez warned that the United States is on a "dangerous path" that could lead to a "bloodbath in Cuba" in response to President Donald Trump's continued ...

# Cuba's 2 5G Silicon Photonics Technology Stockpiles

Since late 2024, the island has experienced repeated total grid collapses, rolling blackouts lasting 18 or more hours per day, and a fuel shortage that has left its aging power plants ...

The recurring blackouts in Cuba are not random accidents; they are the clearest evidence of a grid that is stretched to its limits. In September 2025, the island's national grid collapsed once ...

Cuba podr#237;a tener su propio Silicon Valley. Se llamar#225; Cayo Digital y se ubicar#225; en la Isla de la Juventud. El gran impulsor del proyecto es Rusia, interesada en potenciar la expansi#243;n ...

The hope felt when President Obama visited Cuba in 2016 has given way to despair as the island struggles under the oil embargo ordered by President Trump.
