

## Distribution Box xsp

The XSP series of splitters offer the highest level of reliability for professional use for events or on installations. The specially designed power supply ensures the safe operation even under harsh ...

A Swisscon DMX512 Optical Isolator Splitter Box, model number Sirs-e XSP-5B-US, is a device used to isolate and split DMX512 signals for various applications in stage lighting and effects systems.

The DMX512 input data is optically isolated from the output section, which divides the data into five separate buffered outputs. This allows DMX to be sent to any point without the need to "daisy chain" ...

The XSP series of splitters offer the highest level of reliability for professional use for events or on installations. The specially designed power supply ensures safe operation even under harsh mains ...

Whether you need a portable truss-mounted splitter, a rack-mounted version for touring, or a permanent installation unit, the XSP series ensures flawless DMX signal distribution every time. The XSP series ...
