

Distribution box finished product

This production line is equipment for production of distribution boxes. The strip coil to be processed is manually placed on the uncoiler, and then corrected and tensioned.

Constructed from high-quality cold-rolled steel and finished with a durable powder coating, this enclosure provides excellent protection against dust, dirt, and mechanical impacts.

We manage the receipt, storage, and rapid distribution of your finished goods with precision. Our streamlined processes ensure timely deliveries and maintain the highest quality standards.
