

# FC-FC Fiber Optic Patch Cord Armor

FC-FC patch cords have strictly overdefined precise tolerances between the cable, the optical source, the emitter and the detector that ensures reliable data transfer in high speed fiber networks.

FC Fiber Optic Patch Cord stands for Fixed Connection. It is fixed by way of a threaded barrel housing. FC-FC patch cords are typical in test environments and for single mode applications. FC connectors ...

Our high-quality armored patchcords are available with various connector types, including SC, LC, FC, ST, E2000, and MTRJ, combining durability and reliability to meet your connectivity needs effectively.

These multimode fiber optic patch cables have all of the features of our standard cables but are built with two layers of armored furcation tubing, making them both light tight and extremely durable.

?Special Design? This outdoor armored fiber optic patch cord features an added layer of stainless steel tubing to protect the fiber, providing high tensile strength, compression resistance, bending ...

These robust armored fiber optic patch cable is engineered to withstand harsh environments and can endure damage and environmental challenges, including protection against rodent interference.

The rugged armored cables allow optical fiber to be installed in the most hazardous areas, including environments with slight dust, oil, gas, moisture, or even damage-causing rodents.

The Buaco Simplex Armored Fiber Patch Cord is designed to meet the TIA/EIA 492AAAA and IEC60793-2-10 A1b standards, as well as comply with RoHS specifications. The OS2 fiber patch ...

Built with a rugged steel armor layer, these cables are engineered to resist crushing, impact, and rodent damage--without the bulk, weight, or stiffness of traditional armored cables.
