

Fast ai server

This quick guide walks you through the process of setting up a local environment for machine learning, starting with the Fast.ai tutorial series. It's designed for Windows PCs with an Nvidia graphics card.

fast.ai has 124 repositories available. Follow their code on GitHub.

fastai is a deep learning library which provides practitioners with high-level components that can quickly and easily provide state-of-the-art results in standard deep learning domains, and provides ...

Answer.AI is a new kind of AI R& D lab which creates practical end-user products based on foundational research breakthroughs.

Fast.io API Documentation Workspaces for Agentic Teams. Collaborate, share, and query with AI -- all through one API, free.

In the fall of 2018, fast.ai released v1.0 of their free open-source library for deep learning called fastai (without a period), sitting atop PyTorch. Google Cloud was the first to announce its support.

It uses custom modules for environment variables, response and payload definition, and AI access. Finally, it runs the FastAPI application using uvicorn on localhost port 8080.
