

Fiber Optic Endface Inspection Instrument Calibration in Barbados

Leverage more than 50 years of knowledge and experience and tap into a global network of ISO 17025 accredited NIST traceable calibration labs and support offices.

Whether you're dealing with laser sources, LED sources, optical power sensors, or optical spectrum analyzers, we've got you covered. Our accredited calibration services conform to ISO/IEC ...

Dimension is committed to building a series of portable fiber optic end face probes/microscopes, becoming ideal tools for inspecting fiber connector end-face defects before and after network ...

From Power Meter/Light Sources, OTDR any test and measurement equipment will require calibration. FiberOptics will calibrate along with testing the ferrule and connector enfaces to ensure they are ...

We calibrate fiber optic test equipment to NIST standards. Avoid network issues. Quick turnaround. Stay industry compliant with FIS.

Sumix offers advanced support for Polarization-Maintaining fiber inspection, including automatic angle measurement and custom Pass/Fail parameters to match connector specifications.

The VIAVI fiber optic inspection tools allow you to quickly and accurately determine the cleanliness of fiber connections when installing new networks.

Dimension's Dual-Magnification Fiber Optic Inspection Equipment enables fast, efficient inspection of fiber end-faces using both 400x and 200x magnification. With dual-screen simultaneous display or ...

Various instruments are used for inspecting bare or connectorized fiber endfaces: fiber microscopes, videoscopes and interferometric analyzers.

Inspect individual ferrules or different sized Mil-Aero shell connectors at the same time. We can customize a fixture for your specific needs.
