

# Fiber optic switch lighting

Custom fiber optic lighting solutions delivering uniform illumination, durability, and design flexibility for membrane switches and electronic interfaces.

The fiber optics allow a single light source to be placed remotely, with the option to use multiple sources for variable colors and intensities. Even a single layer of fiber optic panels can have excellent tactile ...

A fiber-optic switch is a device used in fiber optics to route light from one or more input fibers to one or more output fibers. It can act as a simple on/off switch or a ...

These MEMS single mode switches are designed to be easily integrated into optical systems. The highly reliable MEMS technology is characterized by a long lifetime, high reliability, and high durability (max ...

Fiber switches are based on the piezo principle. Traditional switches based on optical components, like lenses or prisms will always result in a wavelength limitation and potential light loss. Piezo driven ...

Need backlighting for your membrane switch? Compare EL, LED, and fiber optic options to find the perfect balance of brightness, durability, and cost for your design.

Makers of innovative, high quality optical switches, tunable filters, variable optical attenuators, and test equipment for optical signal switching, optical network monitoring and restoration, video distribution, ...

Based on a patented technology that provides a robust method of altering the light path using a prism, this series of products has a drastically simplified platform configuration offering high reliability and ...

This guide delves into the common uses of optical switches, the advantages they bring to each application, and the criteria for selecting the most suitable switch for your specific needs.

Choose from our selection of fiber-optic switches in a wide range of styles and sizes. Same and Next Day Delivery.

A fiber-optic switch is a device used in fiber optics to route light from one or more input fibers to one or more output fibers. It can act as a simple on/off switch or a complex matrix switch with multiple inputs ...
