

GNR Spectrometer F20

If you are looking for a reliable optical emission spectrometer for quality control or laboratory use, this technology is one of the most widely adopted industrial solutions to obtain fast, repeatable results.

GNR offer a complete range of Optical Emission Spectrometers and X-Ray products to meet the many applications required in today's modern laboratories and foundries. Based in the UK, we offer a fast ...

GNR Model F-20 Optical Emission Spectrometer, s/n 05/43-FVN12 (Located at Foundry) In Former Holland Alloy Foundry & Pattern Shop

Products from GNR UK-based supply, service and support is available on all of our products. Optical Emission Spectrometers From small desk top to full laboratory systems.

GNR Model F-20 Optical Emission Spectrometer.

The S3 MiniLab 300 is the latest addition to our range of Optical Emission Spectrometer designed by GNR. The MiniLab range is recognised as one of the most compact and highly performing optical ...

R3 RotrOil spectrometer instrument is a compact, transportable and easy to use optical emission spectrometer designed specifically to determine trace concentration in wear metals, polluting ...

This analytical instrument is part of a setup that includes the spectrometer itself alongside a computer system comprising a desktop tower, monitor, and mouse, facilitating data acquisition and analysis.
