According to Russian Construction, the elevator's cabin moves without switches from the second underground level to the 94th story. Schindler freight-passenger elevator will go up at the height of ...

The higher tower of the complex located in the eastern part of lot number 13 was formerly known as Tower "A". But in November 2006, to avoid name competition with Naberezhnaya Tower, it was renamed Tower "Vostok (East)". Tower East is designed to have 95 above-ground and 3 underground floors, and 17 high-speed elevators will be installed there (JP. Kocher). According to the company Potok, which is the builder of the tower, it used grade B90 concrete which is twice as strong as regular concrete and w...
