

High Temperature Resistance of EPON Equipment for Power Systems

Cured EPON Resin 828 is highly resistant to a broad range of chemicals, including caustic, acids, fuels and solvents. Chemically resistant reinforced structures and linings or coatings over metal can be ...

This high retention of strength, electrical, and other properties at elevated temperature is due to high crosslink densities obtained with EPON Resin 164 systems.

The viscosity/temperature profile and the specific gravity/temperature profile for EPON Resin 828 are displayed in Figures 2 and 3 respectively for your guidance.

EPON Resin 863 offers improved crystallization resistance relative to many BPF epoxy resins, including EPON Resin 862. When stored for 6 months at 40°F, EPON Resin 863 remains clear and free of ...

Measured with PRBS 27-1 test pattern @1.25Gbps, Low Pass Filter is on. Max. Loss of Signal. Asserted when light is off.

Epon Resin 154 is a multi-functional phenol novolac epoxy resin that is considered a workhorse resin for high temperature applications. Epon Resin 154 has functionality of ~ 3.6, and this high functionality ...

EPON Resin 828 is an undiluted liquid epoxy resin that is available in tank cars, tank trucks and 500 pound net closed head drums. EPON Resin 828 is normally shipped in bulk from 150 °F (66 °C) to ...

Data Center Power Equipment Thermal Guidelines and Best Practices Whitepaper created by ASHRAE Technical Committee (TC) 9.9 Mission Critical Facilities, Data Centers, Technology Spaces, and ...

In the EPON system, there are various types of ONU devices in numerous amounts. As different types of ONU require different upgrade files, the task of upgrading ONU devices is quite ...

Sercomm is excited to partner with Harmonic to bring our I-TEMP 10G PON SFP+ ONU to market, now certified with Harmonic's cOS PON OLT portfolio. This collaboration provides ...
