This guide provides information on how to select the appropriate Distribution Box for Electric project. If you have any questions about distribution boxes, please feel free to contact us.

For most homes, a 100-amp main is sufficient to handle all electrical needs; however, many new-home builders now install 150-amp or 200-amp services to ensure plenty of capacity.

For most homes, a 200-amp panel is sufficient. However, larger homes or those with unique power needs (e.g., EV chargers or workshops) might require 300 or 400 amps.

However, we recommend most homeowners upgrade to a 150 Amp, even in this square footage range to unlock the potential to expand their usage beyond the bare minimum appliances.

The most common sizes in residential use are 100 amps, 150 amps and 200 amps. The amperage (amps) referred to is a measurement of electricity. The higher the number of amps, the more ...

Most modern homes need a 200-amp service panel to safely power electric appliances. Older homes with 60 or 100 amps often need upgrades to meet today's energy needs.

Common residential ratings found here include 100, 150, or 200 amperes, with 200 amps being the standard for most modern construction. Before attempting this inspection, it is imperative to ...

ABB provides load centers in 40 Amp, 70 Amp, 100 Amp, 150 Amp, 200 Amp, and 225 Amp options. A licensed electrician will assess the specific needs of the dwelling by evaluating appliances, lighting, ...

For most homes, a 200-amp panel is sufficient. However, larger homes or those with unique power needs (e.g., EV chargers or workshops) might ...

There may be one or more circuits with #12 copper wire, which should have 20-amp protection. Large appliances, such as electric water heaters and central air conditioners, may require 30-amp service, ...
