

# How to quickly melt invisible optical cables

Discover the invisible optical fiber glue gun with 360° adjustable nozzle, 220° max temperature, and fast melting for FTTR broadband installation.

Do not crush the cable or allow it to kink. Doing so may cause damage that can alter the transmission characteristics of the cable; the cable may have to be replaced.

Check the entire cable route, and use the hot-melt glue tool or cable clip to reinforce the cable at corners and other parts where the cable does not stick reliably.

Insert the invisible cable into the designated slot of the hot melt glue gun or adhesive tool. Insert glue sticks and preheat the tool to the proper temperature.

Install invisible fiber optic cables with a hot melt glue gun in just 5 minutes! No drilling, no tape residue--just squeeze and stick with the hot melt glue gun, and the invisible fiber...

It heats the hot-melt adhesive on the surface of an optical cable, passes the optical cable through a guiding trough, and then sticks the optical cable on a wall, baseboard, or ceiling. The tool has a ...

Equipped with invisible fiber optic cable tray fixing column and fiber optic outlet slot, simplifying wiring tasks and making operations easy. [Fast and Efficient] Glue and fiber dispense simultaneously for a ...

Install invisible fiber optic cables with a hot melt glue gun in just 5 minutes!

In this article, we will discuss the steps required to melt indoor optical fiber optic cables, including the equipment required, safety precautions, and techniques to achieve a high-quality ...

Equipped with notched gluing mouth, stable gluing effect, also equipped with invisible fiber cable tray fixed column and fiber outlet slot, easy wiring, simplify the operation process.
