

Huawei Switch 5320poe

Both switch models include 4x10G SFP+ for uplinks and/or stacking. The extended temperature switch models come with one fixed power supply and support an optional external Redundant Power Supply ...

48-port gigabit models, the 5320 is a stackable universal hardware switching platform, providing end-to-end secure network segmentation and advanced policy capabilities.

Huawei Ethernet Switches Turbocharge your enterprise network with high-performance, high-availability for resilient services and simplified management.

5320 OS selection can also be automated with ExtremeCloud IQ so that the desired OS can be automatically loaded at switch start-up, facilitating remote OS enablement.

Realize wired and wireless convergence from access to core, manage up to 10,240 APs with a single switch, and achieve simplified O& M with unified user authentication.

The Extreme Networks ExtremeSwitching 5320-48P-8XE is a cost-effective 48-port PoE+ managed Layer 3 access switch with 8x 10GbE SFP+ uplinks. Purpose-built for enterprise edge deployments, ...

One switch can now energize pan-tilt-zoom cameras, multiradio APs, LED lighting grids, and mini-PC kiosks--while moving data at multigigabit line rate. Dynamic allocation and scheduled power policies ...

Available in 16, 24, and 48 port models, the 5320 delivers secure, efficient connectivity across edge and wiring closet deployments while supporting 30W PoE (802.3at Power over Ethernet) for a wide range ...

The S5320 is easy to install and maintain, reducing workloads for network planning, construction, and maintenance. The S5320 uses advanced reliability, security, and energy conservation technologies, ...

One switch can now energize pan-tilt-zoom cameras, multiradio APs, LED lighting ...

The 5320 Series includes fixed 16, 24- and 48-port 1 Gigabit models that are available in 30W PoE and non-PoE versions. The integrated 1Gb SFP uplinks can be upgraded to 10Gb.
