

Huijue Server FC Interface 8

I don't need a fast network interface on this server (it's only for serving storage, uptime heartbeat etc). So, using slot 1 for DAS, and slot 2 for fiber channel is fine for me, and I can use the onboard LAN ...

A physical Fibre Channel interface can be configured as an E port, an F port, or an SD port. Interfaces may also be configured in Auto mode; the port type is determined during interface ...

This document describes the configurations of Trill, FC and FCoE, DCB, and NLB Server Cluster Association.

The number and operational speed of Fibre Channel (FC) ports on a NAS server are dependent on the server model. Refer to the hardware manual for your server model for more information on the ...

At the heart of every fiber-to-fiber and fiber-to-device interconnect is a precision fiber optic interconnect assembly. Huijue Net is committed to utilizing the most advanced precision component design, ...

You can configure virtual Fibre Channel interfaces without a Storage Protocol Services license, but these interfaces will not become operational until the license is activated.

As a leading Fiber Optical Components manufacturer and supplier, Huijue has been providing customers with the best and most suitable products and solutions. Our headquartered in Shanghai, it ...

To change a Layer 2 Ethernet interface to an FC interface, use the port-type fc command in Layer 2 Ethernet interface view. To change an FC interface back to a Layer 2 Ethernet interface, use the port ...

FC-PI-8, which stands for Fibre Channel Physical Interface 8, is the latest iteration in the Fibre Channel physical interface standards. It doubles the data rate of the previous 64GFC standard ...

Based on the IEEE T11 FC-BB-5 standard, Fibre Channel over Ethernet (FCoE) is a protocol to transmit Fibre Channel frames over Ethernet networks. Typically, data centers have a dedicated LAN and ...
