

Indoor distribution box jumper wires

Used to jumper connections at an analogue or low bit rate MDF or distribution frame. This product is PVC insulated to provide flame retardancy in indoor applications.

Pacer wire jumpers simplify panel installation. They quickly snap into place and are ideal for field service. Available in a range of sizes, colors, and styles.

The jumper wires are used for interconnection between terminal blocks at main distribution frames (MDF), cross connection cabinets (CCP) and distribution frames or boxes.

Choose from our selection of jumper wire, including electrical wiring and connecting, test leads and cords, and more. Same and Next Day Delivery.
