An illustrated study of how coalition armor in Iraq in 2003-06 handled a unique multi-threat environment, from enemy armor to IEDs. 80 pages all inclusive, with maps, color plates and photographs, side bar ...

Nearly all Iraqi military personnel have a PASGT ballistic helmet, generation I OTV ballistic vest and radios. Their light weapons consist of stocks of AKM and the German Heckler & Koch PSG1 sniper rifles, Type 56 assault rifles, American M16A2, M16A4 rifles and M4 carbines. Soviet PKM machineguns are still used by machine/support gunners and AT soldiers use RPG-7s.

Nearly all Iraqi military personnel have a PASGT ballistic helmet, generation I OTV ballistic vest and radios. Their light weapons consist of stocks of AKM and the German Heckler & Koch PSG1 sniper ...

Body armor was the IBA for the army while the Marines were still fielding the PASGT (flak jacket) in large numbers with only some units getting the IBA. The standard Kevlar was used by both.

These are the types of plate carriers exported to Iraq by Point Blank. This particular vest design was one of the most common ones seen in use by the Iraqis. While largely being worn by the Iraqi Army, this ...
