

Laser pointer laser diode

Laser Diodes are compact, efficient light sources that emit coherent light through semiconductor materials. They are widely used in various applications, including telecommunications, barcode ...

Browse a diverse selection of laser pointers, from compact designs to long-range models. Find reliable, durable options suitable for a variety of applications.

Leonardo's direct diode laser pointers are ideal for marking and identification applications where low size and weight are a priority. These military-grade devices deliver exceptional beam stability across a ...

A laser pointer or laser pen is a (typically battery-powered) handheld device that uses a laser diode to emit a narrow low-power visible laser beam (i.e. coherent light) to highlight something of interest with ...

Berlin Lasers offers a variety of genuine industrial alignment lasers, laser pointers, laser diode modules, laser line generators, cross line laser modules, laser diodes, ...

A laser pointer is a small (usually battery-powered) laser device designed for pointing at objects by illuminating them with a collimated visible laser beam.

It integrates a 2.4 GHz remote controller, detachable USB receiver and laser pointer into one handy pen type unit. Three independent buttons enables you to scroll a page up and down or switch to the next ...

Berlin Lasers offers a variety of genuine industrial alignment lasers, laser pointers, laser diode modules, laser line generators, cross line laser modules, laser diodes, DPSS lasers, fiber optic detectors, laser ...

Working with our manufacturer in Taiwan since 1994 we have developed a reputation for high quality laser diodes, laser modules, laser pointers and laser levels which has allowed us to stand the test of ...

This is the ultimate beginner's guide to the laser diode. Learn how lasers work and how you can use them in your own projects with this guide.

A laser pointer or laser pen is a (typically battery-powered) ...
