

Liechtenstein Micro-Module Smart Installation Solution

Smart metering rollout in the heart of Europe Landis+Gyr was the supplier of choice for a country-wide rollout in the principality of Liechtenstein.

The project in Liechtenstein comprises 27,500 smart household meters and 1,000 smart industrial meters, along with a full suite of communication and software solutions, designed to meet the highest ...

What is a smart microgrid? Smart, flexible Power Management solutions that optimize energy production in a microgrid We are working with customers and communities across the globe to install smart ...

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency ...

Discover Smart Micro Modular Data Center Solutions with One Row One DC, delivering integrated power and cooling, flexible scalability, and reliable performance.

Installed discreetly behind existing switches, the micro-module transforms each control point into an intelligent building node. Thanks to distributed intelligence, each module communicates over the ...

Standardized plug-and-play designs have reduced installation costs from \$85/kWh to \$40/kWh since 2023. Smart integration features now allow multiple industrial systems to operate as coordinated ...

Elektroinstallationen in Ihrem Zuhause oder Firmengebäude sind unsere Kernkompetenz. Wir installieren komplette Stromanlagen für Private, öffentliche Betriebe und Kunden aus der Industrie, ...

This training course equips participants with comprehensive knowledge in hydraulic resource assessment, turbine and generator selection, digital control systems, smart instrumentation, and ...

Thanks to state-of-the-art spectral optimization, Megasol solar modules perform up to 15% better than customary modules under cloudy conditions and during dusk or dawn.
