

Low-power industrial switches in East Africa

Our electrical engineering portfolio is most vibrant with experience in project management, contract planning, and construction of low and high voltage electrical power lines.

IMC is proud to offer the UNI 5000™ line of Low Voltage Switchgear. Our Switchgear is tested to UL, CSA and IEC standards to guarantee suitability for applications world-wide.

These facilities produce low, medium, and high-voltage electrical products across five main categories: power distribution and control, electrical switches and sockets, cables and wires, transformers, and ...

At Specialised Power Systems, we take pride in delivering high-quality engineering solutions for diverse power distribution needs. As a trusted provider in the industry, we source our products from ...

Discover customized low voltage solutions from IET, designed to meet diverse industry needs and ensure optimal performance.

ST's industrial low-side intelligent power switches are bullet-proof to cope with harsh industrial environments and include full embedded protection for non-dissipative short-circuits, ground and ...

With East Africa's rapid economic growth and expansion of sectors such as healthcare and data centres, the new switchboards are expected to play a role in strengthening reliable power ...

For four decades, ElectroMechanica (EM) has been at the forefront of delivering cutting-edge electrical and automation solutions to industries across Southern Africa.

Power and Distribution Transformers, Switchgear, Circuit Breakers, Vacuum Interrupters, Network Protection, Control Gear & more. DVM EAST AFRICA LTD founded in the year 2020 in Dar es ...

Coupled with our understanding of the African continent's Electro Mechanical and Infrastructural needs, puts us in a position to overcome the challenges of infrastructure and industrial project delivery in Africa.
