

# Malta Data Center Hot Aisle Armor

THE GREEN GRID: ASHRAE Data Center Cooling Guidelines: Developed in collaboration with ASHRAE, this document provides best practices for data center cooling, including hot and cold aisle ...

Based on a non-raised floor environment, this hot aisle containment project uses dual hinged doors and the Polar Cap 2 retractable roof system.

Containment panels or strips create a partition to isolate either the server supply air (cold aisle) or the exhaust air (hot aisle). Preventing the supply and exhaust air from mixing significantly increases the ...

Rittal's aisle containment solutions reduce data center cooling costs by up to 30%. Modular design ensures quick deployment, improved airflow control, and easy scalability with existing IT infrastructure.

With hot aisle architecture, the supply air is directed onto the front of the racks and the hot discharge air ducted back to the PAC units through the ceiling void; this provides better room temperature control ...

Get expert hot and cold aisle containment solutions for your data centres with Ardmac. Our tailored approach maximises efficiency.

Our system uses vertical panels to direct hot air generated by your data center's equipment into the hot air return or a drop-down ceiling grid, and prevent it from mixing with cold air. This solution can ...

We offer a wide range of customizable hot aisle containment solutions with integrated cable tray systems to meet specific client requirements and optimize data center airflow management.

By reducing hot/cold air mixing, you can raise supply and chilled-water setpoints, which decreases compressor and fan energy while maintaining safe server inlet temperatures.

Depending on your facility's layout, Armstrong Aisle Containment Solutions offer both Hot Aisle Containment (HAC) and Cold Aisle Containment (CAC) systems to suit new builds or retrofit ...
