

Model of seismic support for air duct cable trays

Suspended systems such as piping, equipment and ductwork need seismic braces to keep them from swaying during an earthquake. Seismic braces can be flexible using aircraft quality cables, or rigid ...

Table S1-3 below will show the seismic restraint requirements for each length of pipe or duct, and then list which seismic restraint locations will fulfill those requirements.

We offer a pre-engineered, time-saving solution which braces and secures non-structural equipment within a building to minimize damage from earthquakes or seismic events.

quick guide for planning and inspection purposes. The details on making structural connections and pipe attachments for the seismic restraint cables and components

Cablofil Wiremesh Cable Tray concept based upon performance, safety and economy; three qualities which make Cablofil Wiremesh Cable Tray system preferred by installers. Cablofil adapts to the most ...

Support type Earthquake support brackets are divided into four types based on their applications: Pipeline support (for water and fire protection pipelines) Cable tray support (for cable trays and bus ...

The Easy ex EFSCK Series Seismic Cable Restraint Kits are engineered to secure suspended non-structural components--such as ductwork, piping, conduit, cable trays, and HVAC ...

Eaton's TOLCO seismic bracing solutions help protect people and non-structural components during an earthquake. For over 60 years, the mechanical, electrical, and fire protection trades have relied on ...

The Gripple range of seismic cable bracing systems are specifically designed & engineered to brace and secure suspended non-structural components. Gripple products are designed to save time, labor and ...

Seismic bracing in these cases consists of tension-based cable braces or rigid steel braces. Cable seismic braces link part of the conduit system to a structural member.

Please visit us online for many additional tools and resources, including; a step-by-step design guide, quick-reference information, BIM models, a project cart, resource downloads, and more.
