

No network connection to the core switch

Unlike access switches, which connect directly to end-user devices, the core switch focuses on aggregating and routing traffic between other switches, minimizing latency and ...

when you ping 8.8.8.8 from 172.30.235.2 (the switch) and then issue the command "show ip nat translation *" on the router, do you actually see an entry for 172.30.235.2 ?

Generally, multiple data switches are used at the core layer of a network so that a large amount of data can be routed to the layers in the hierarchy. Another reason for using multiple data switches at the ...

Corrected but still no internet access on Core Switch. Have you looked at the vlan database and verified that the core switches had the vlans created ? It seems to me you are routing ...

RE: A device can be pinged from core switch (router) but not the switch it's plugged into. Why? This is likely related to how the vlans are setup with the gateways on the core switch, and the ...

In this article, we'll take you through a comprehensive guide on how to fix the "no network access" issue, so you can get back online in no time. Before we dive into the solutions, it's essential ...

Network Switch Troubleshooting: Fix connectivity, speed, and power issues fast with step-by-step solutions for common switch problems.

This article will list a few simple steps about how to do a check on the switch when the switch has no Internet access and try to solve the problem.

We have a pair of Dell N3224P-ON switches and today's morning my colleague gave me a task and instructions to remove some unused VLANs. I'm sure I removed the correct VLANs. When I saved ...

A comprehensive switch troubleshooting from the physical layer to the data link layer to the network layer to find out why your network switch is not working.

No network connection to the core switch
