

OEM Optical Modulator 200G

After months of continuous operation in harsh environments, the Mellanox 200G transceivers have proven to be both durable and reliable. The quality of its construction is evident to all, with consistent ...

200G QSFP56 transceivers with PAM4 modulation for high-speed data center connectivity. SR4 and FR4 options supporting 100m to 2km reach.

A 200G optical transceiver is a high-speed optical module designed to support 200Gbps data transmission rates. It uses multi-channel or aggregation technology and is widely used in data ...

After months of continuous operation in harsh environments, the Mellanox 200G ...

Ideal for 200G Ethernet and data center interconnects (DCI). This transceiver offers plug-and-play deployment, low-latency transmission up to 10km, and seamless integration with major switches.

Boost network performance with 200G optical transceivers. Designed for data centers, 5G, and cloud infrastructure, our QSFP56 modules deliver low latency, high reliability, and seamless compatibility.

The 200G QSFP-DD SR8 Transceiver is designed to transmit and receive serial optical data links up to 28 Gb/s data rate (per channel) over multi-mode fiber. It is a small-form-factor hot pluggable ...

Gigalight's GQS-SPO201-FR4CZ 200GE QSFP56 Optical Transceiver modules are designed for use in 200 Gigabit Ethernet links over SMF28 single-mode fiber. They are compliant with the QSFP MSA ...

Each device pairs a wavelength-locked DFB laser with a single-ended electro-absorption modulator (EAM) to deliver clean 200G-per-lane transmission with low power consumption.

10Gtek's 200G QSFP56 FR4 transceiver module is designed for use in 200 Gigabit Ethernet links over 2Km single mode fiber. The module has 4 independent electrical input/output channels operating at ...

It is compliant with IEEE 802.3cd, IEEE 802.3bs, QSFP56 MSA, ...

200G QSFP-DD/QSFP56 optical transceiver is a high-speed network transmission device designed for 200G Ethernet interconnection. It uses PAM4 modulation technology and can achieve transmission ...

The 200G QSFP56 transceiver utilizes 4 lanes of 50G PAM4 DSP modulation, making it the standard for native 200G AI switches. The 200G QSFP-DD optic, utilizing 8 lanes of 25G NRZ, provides excellent ...
