

Optical Module Network Analyzer

The VIAVI ONT Product Family supports testing and verification for new high-speed network elements across a wide range of technologies and scenarios. Our test platforms help manufacturers scale to ...

This product is a passive optical device and does not require electrical power. It can be used on a variety of optical networks including: ATM, Gigabit and Fast Ethernet.

With "scattering data" analysis selected, the scattering matrix of the element is used for the calculation of the system in frequency domain; with the "impulse response" selected, the ONA calculates the ...

It makes optical module manufacturers need to test MAC layer Traffic in addition to PRBS. Different from the traditional Bit Error Rate Tester, the Network Analyzer supports Ethernet packet test, true FEC ...

Select the VNA you need based on the number of sources, integrated low-noise receivers, maximum frequency, and more. Explore our wide range of benchtop vector network analyzers from Essential to ...

The VectorStar ME7848A opto-electronic network analyzer (ONA) provides a modular approach to optical measurements of O/E, E/O, and O/O devices operating at 850, 1310, and 1550 nm wavelengths.

VIAVI has developed an industry-leading portfolio of optical spectrum analysis test solutions for lab, field, and manufacturing applications.

Test and characterize modern optical components, including photonic integrated circuits (PICs) and silicon photonics, with unmatched speed, precision and accuracy. Accelerate and improve your ...

The ME7848A opto-electronic network analyzer (ONA) system comprises a VNA, a calibration O/E module, and a laser/modulator converter assembly. Together, they allow calibrated RF response ...

The 110 GHz VNA has state-of-the-art mmWave modules manufactured by Anritsu and based on a patented technology called NLTL. This technology enables ultra-stable, highly accurate, and precise ...
