

PAM4OTN Router Original Authentic Product

The FCC banned the sale of new consumer-grade Wi-Fi routers and mobile hot spots manufactured outside the US. Here's what it means for you.

The FCC's ban doesn't apply to any existing routers that it has already authorized, so you don't need to rush out and replace your router immediately.

March 23 (Reuters) - The U.S. Federal Communications Commission said on Monday it was banning the import of all new foreign-made consumer routers, the latest crackdown on Chinese-made ...

Which routers, exactly, are entirely designed and produced in the US? UPDATE: The FCC notice states that only NEW MODEL that have not yet been approved by FCC are banned.

Original Story: The FCC's ban on foreign-made Wi-Fi routers has many of us questioning whether we'll be able to stick with the router brands we like best.

After putting nation-wide blocks on companies such as Huawei and DJI in recent years, the US Federal Communications Commission (FCC) has now placed a blanket ban on new routers ...

While some of the affected routers will be vulnerable to compromises that hijack the devices and use them for cybercrime and attacks, this ban does not distinguish between companies ...

After putting nation-wide blocks on companies such as Huawei and DJI in recent years, the US Federal Communications Commission (FCC) has now ...

Early this past week, the government banned new models of all foreign-made internet routers. This is a vast expansion of the ban it was considering of solely TP-Link models. Still, there's ...

If the router exists in the physical world in 2026, there is a very good chance it was made somewhere other than the United States, and is therefore now covered.

Last week, the United States Federal Communications Commission (FCC) took the drastic step of banning the future import of consumer-grade Wi-Fi routers manufactured overseas.
