

PLC13 splitter

Planar Lightwave Circuit (PLC) Splitter is a type of passive optical component using silica optical waveguide technology to distribute optical signals from the Central Office (CO) to multiple premise ...

Engineered with advanced planar lightwave circuit technology, our splitters ensure uniform signal splitting, low insertion loss, and excellent stability--even in demanding network environments.

Our PLC Fiber Splitter with Small Form Factor and High Reliability, wide operating wavelength range and good channel-to channel uniformity. It Provides a Low Cost Power Distribution Solution.

Learn everything about PLC Splitter: what they are, how they work, and how to source the right one for your network. Complete buyer's guide.

A PLC Splitter is a component that splits the optical light power from one route into different routes. The Molex PLC Splitter offers premium factory controlled optical performance on a variety of connectors ...

NEXCONEC Planar Lightwave Circuit (PLC) splitters are specially designed for Fiber Optic Distribution Network applications. PLC splitters are available in the form of compact component type, ABS box ...

The Splitter Modules utilize PLC chips manufactured with Plasma Chemical Vapor Deposition (P-CVD) technology, and its patented fabrication process for providing stable optical specifications.

lanar Lightwave Circuit (PLC) Optical Splitters Wirewerks™ Planar Lightwave Circuit (PLC) optical splitters deliver the best performance, and the highest re. iability for today's broadband systems ...

PLC splitters are split or combine light from one or two incoming fibers to multiple numbers of outgoing fibers having 1 or 2 input channels and up to 64 output channels. They perform uniformly over a wide ...

Discover a wide range of reliable fiber optic splitters. Our PLC and FBT splitters offer low loss and various split ratios for FTTH, PON, and CATV networks.

Our PLC Fiber Splitter with Small Form Factor and High Reliability, wide operating ...

PLC13 splitter
