

# Passive wavelength division multiplexers for sale

Our products successfully enable operators to expand capacity and throughput by segmenting data bandwidth across multiple wavelengths, allowing an increase in services without laying additional fibers.

Our products successfully enable operators to expand capacity and throughput by segmenting data bandwidth across multiple wavelengths, allowing an increase in ...

The FiberPlex WDP16 is a rack-mountable passive 16 channel coarse wavelength division multiplexer. Unlike the similar FiberPlex products in the WDM series, this unit is passive and all connected fiber ...

Wavelength Division Multiplexers (WDM) by AFL include CWDM LGX, Thin film filter CWDM, single channel OADM, DWDM LGX, Optical FTTx channel and RFOG wavelength division modules.

This device is a Wavelength division multiplexer for WDM, CWDM or DWDM applications. This unit also can customize our equipment for use with these optics.

The FiberPlex WDP8A-L and WDP16-L from Patton Electronics are passive coarse wave division multiplexers (CWDM) that combine up to 8 or 16 sources of data on ...

HeyOptics offer passive fiber optics include CWDM mux demux, DWDM mux demux and OADM add & drop and up to 18 CWDM and 96 DWDM ITU Channels, with LC Duplex or SC connectors in ...

A WaveSmart <sup>®</sup> wavelength division multiplexer increases fiber capacity by combining or separating multiple wavelengths over a single fiber. Use of a WDM will replace the need to add more fiber cable ...

The FiberPlex WDP8A-L and WDP16-L from Patton Electronics are passive coarse wave division multiplexers (CWDM) that combine up to 8 or 16 sources of data on a single fiber pair.

A Wave Division Multiplexer (WDM) is a coupler that enables you to channel a signal to multiple devices operating at different wavelengths.

The Patton Model WDP8A-L is a rack-mountable passive 8-channel coarse wavelength division multiplexer. Unlike the similar products in the WDM series, this unit is passive, and all connected ...

The FiberPlex WDP8 is a rack-mountable passive 8 channel coarse wavelength division multiplexer. Unlike the similar FiberPlex products in the WDM series, this unit is passive and all connected fiber ...
