This document provides an operations manual for a WEDM (wire ...

The goal of this project is to design and build up a programmed automated wire cutting machine to accomplish low expense cutting. It works quickly and decreases the cutting time.

The working principle of wire-cutting machines is based on the use of a pulsed power supply that sends out a series of pulsed voltages to the workpiece electrode and the molybdenum ...

Therefore, in this article, we will introduce you to the working principles of wire cut cutting machines, their basic structure, components, advantages and disadvantages, as well as their ...

This document provides an operations manual for a WEDM (wire electrical discharge machining) machine. It discusses safety warnings, machine components, driving systems, the controller, working ...

In order to provide instant wire cutting and stripping, we have designed an automatic wire cutting and stripping machine. The device has a feeder pulley that feeds wire from a wire reel or spool into a ...

The distribution box is to assemble the switchgear, measuring instruments, protective appliances and auxiliary equipment in the closed or semi closed metal cabinet or on the screen ...

A distribution box is an essential component in electrical engineering, widely applied in residential, commercial, and industrial projects. Customers today not only care about the performance of the ...
