If you are confused by pulsed laser diode specifications, not sure what kind you need, or not an electrical engineer, fear not! This article will help you understand pulsed-current laser diode drivers and ...

One final advantage of using an active LiDAR configuration (where the FET switching causes directly the diode to switching) is that it is possible to pulse the laser several times within a short duration, which ...

I want to try a simple theoretical design of a pulsed laser driver circuit according to what specified in this guideline from LASER COMPONENTS. Since the guide is not exhaustive, I'd like to ...

I currently have a 850nm wavelength laser diode and wanted to know if it was at all possible to create a driver circuit that pulsed my laser for a length of less than 66 nanoseconds with a ...

This paper proposes a nanosecond-level pulse laser diode array drive circuit for LiDAR, primarily aimed at addressing the issue of high-speed scanning drive for the laser diode array at the ...
