

Remote end of fiber optic switch

The 1U Fiber Optic Network Access Control A/B Switch is a non-latching full-duplex optical switch. It is used to control network access via front panel slide switch or remotely using dry contact closures.

Applications include bypassing of FDDI and SONET network stations, automated and remote fiber test systems. Our Fiber Optic Switch moving prism technology combines for excellent durability leading ...

We produce a wide range of turn-key fiberoptic switch systems that integrate fiber components with electronics, firmware, with all computer/internet interface formats having user-friendly graphics ...

There is no electrical loss or electrical bandwidth limit on the fiber optic path. The optical path can be select via a front panel switch or via contact closure input. In event of loss of power, the unit has a fail ...

There is no electrical loss or electrical bandwidth limit on the fiber optic path. The ...

QuickSwitch[®]; Remotely Controllable Fiber Optic Switches to support such applications as Commercial Networks, Industrial Networks, and MiL Spec Operations. SCROLL DOWN to make your product ...

Designed with XENOptics' patented 3D Optical Switching (3D-OS) technology, the XSOS-288 offers fully remote fiber switching, precision monitoring, and unparalleled optical performance -- perfect for data ...

Our fiber optical switches offer several control options - remote control, control via button switch or both. The signal passes through the switch optically, without any electrical conversion.

Mouser offers inventory, pricing, & datasheets for Fiber Optic Fiber Optic Switches.

Shop DigiKey's large in-stock selection of Fiber Optic Switches, Multiplexers, Demultiplexers. View inventory, pricing and order now for same day shipping!

The SEL-2126 is a high-speed communications device that senses contact inputs to route data streams between remote and local relays, or between the remote and one or two transfer relays.

Remote end of fiber optic switch
