

Replacing the distribution box rails

If the inner walls of the distribution box have uniform lines, you may only need to adjust the outflow to fix the problem; however, if the leach field is flooded, you may have to replace the ...

Step 1 - Find The Distribution Box
Step 2 - Excavation
Step 3 - Remove The Distribution Box
Step 4 - Prepare The Ground
Step 5 - Install The Distribution Box
The distribution box is made out of concrete and is buried. Uncover the distribution box by shoveling away the dirt around it. Dig until you reach the bottom of the distribution box, and then expand your efforts, so that there is a foot of space around the box. You will also want to carefully dig out the pipes, exposing several feet of them. See more on doityourself
