Our Raman/EDFA hybrid amplifiers combine Raman's low effective noise figure with EDFA's high output power to provide a high-OSNR solution suitable for high bit-rate long-haul applications.

For submarine applications, Raman amplification minimizes the number of underwater repeaters, enhancing reliability and cost-efficiency, while in terrestrial setups, it facilitates ultra-long-haul links ...

BaySpec's OCI(TM)-F, an ultra-compact, easy push-broom hyperspectral imager covering VIS-NIR/SWIR!

Raman amplification /'r?:m?n/ is a way of increasing the signal strength in an optical fiber. It is often used in a fiber that carries a signal for a long distance (such as in an undersea cable). Technically, it works by stimulating Raman scattering, in which a lower frequency "signal" photon induces inelastic scattering of a higher-frequency "pump" photon in an optical medium in the nonlinear regime. As a result, another "signal" photon is produced, with the surplus energy resonantly passed to the vibrational states of the ...

Single-frequency Raman fiber amplifier delivering narrow linewidth output with high power and low noise. Designed for precision spectroscopy, sensing, lidar and quantum technology applications.

The 1st Order Distributed Fiber Raman Amplifier uses a 14xxnm wavelength laser as the Raman pump to provide gain for C-band signal light, which can effectively ...

The Raman amplifier makes use of stimulated Raman scattering (SRS) within the fiber, which transfers the energy of higher-frequency pump signals to lower-frequency signals.

The 1st Order Distributed Fiber Raman Amplifier uses a 14xxnm wavelength laser as the Raman pump to provide gain for C-band signal light, which can effectively compensate for the attenuation of optical ...

It is a ready-to-use optical amplifier equipped with a broadband pump & signal combiner and individual power monitoring for each channel. The Raman Amplifier is available in both benchtop and ...

This Raman amplifiers buying guide provides technical background, comparison of major types, selection criteria, and an overview of suppliers.
