

Selection Requirements for Long-Distance Single-Mode Optical Cables

Fiber optic cable range varies depending on whether you're using single or multimode fiber. Learn the potential for both cable types.

Singlemode fiber optic cables are best suited for high bandwidth and long-distance applications, while multimode is used for shorter cable runs, typically under 550 meters.

This guide will break down the essentials, from selecting the right hardware to troubleshooting common issues that can arise in long-distance fiber runs.
