

Singapore Primary Distribution Box Construction Project

The RDC warehouse is designed to meet the demands of modern distribution networks, capable of handling high-volume throughput and optimising space utilisation.

Although not formally gazetted for conservation, the central cluster of SIT-built blocks will be retained and repurposed for civic and community uses due to their historical significance as one of ...

We erected the prefab steel sections that came with attached steel box formworks using only bolting. Thereafter, concrete was poured into these steel box formworks, without the further need for ...

SINGAPORE - Two berths at Tuas Port will be open for use by the end of the year, with the port's first phase of construction - comprising 21 berths - completed.

The distribution center is expected to be completed in the first quarter of 2025, Maersk said. Strategically located in the industrial area with direct access to Ayer Rajah Expressway (AYE), ...

At the heart of this groundbreaking development are giant concrete boxes, known as caissons, each standing 30 meters high and weighing 13,000 tons. In this video, we dive into the fascinating ...

Container terminal operations at Tuas Port have begun in 2021 and there are plans to develop the port and construct related facilities for completion in the 2040s.

Strategically situated next to Tuas Port within the Free Trade Zone, the PSCH will be seamlessly integrated with Singapore's extensive supply chain ecosystem, offering unparalleled ...
