

Six-phase power protection device

TEST-630 relay test kit is a the most advanced six-phase relay tester available for type and field testing of electromechanical and digital protections of any kinds of relay.

The CMC 356 is the universal six-phase testing solution for all generations and types of protection relays, where highest versatility, amplitude and power are required.

The six-phase relay protection testing device is an advanced, multi-functional power testing instrument that can simultaneously output six-phase current and six-phase voltage.

Welcome to Eaton"s Bussmann series Selecting Protective Devices (SPD) handbook. This reference document is based on the 2017 National Electrical Code (NEC®) and is a comprehensive guide to ...

Wuhan UHV specializes in producing Six Phase Relay Protection Tester with rich product selection. 15 years experience in power testing equipment production, Looking for Six Phase Relay Protection ...

The Six Phase Relay Protection Test Set has become an essential tool for modern power system protection. With advanced solutions like the HVHIPOT GDJB-1200A, utilities and industries ...

The six-phase electric protection tester has an independent dedicated DC power output, and has a dedicated adjustable DC power output of 110V and 220V. The interface is complete.

Phase-Guard is a self contained power sensing device. It operates on the principle of phase voltage unbalance which may occur in a three phase system. It also provides protection against phase loss.

It can easily complete the protective device test of ABB, Siemens, AREVA and other foreign manufacturers. The test report can be easily derived from the USB port to print.

SIPROTEC 7SL86 combines differential and distance protection for lines and cables up to 6 ends. Ensure high availability with 9ms tripping, flexible I/O, and conformal coating for reliability in ...
