

Standard for Intelligent Power Distribution Cabinets

Home / All Products / Power, Environmental, Security & Connectivity Hardware / Power Distribution Units (PDUs)

Explore how precision power distribution cabinets with intelligent monitoring transform data center power management--from rack-level control to power quality analysis and zero ground ...

Beyond the capabilities of a power strip, a rack PDU offers a range of intelligent features to help control the power distributed to IT devices. Rack PDUs are used in 120V, 200-240V and other environments ...

RackPower sensors add comprehensive environmental monitoring to any RackPower intelligent PDU. Plug and play sensors seamlessly integrate with PDUs and monitoring software.

Think of distribution cabinets as the command center for managing electricity in homes, businesses, and factories. By following these standards, we not only cut down the chances of ...

Basic PDUs only distribute power to the receptacles and does not include any power monitoring. Intelligent Monitored-Switch Ready PDUs include power monitoring and the capability to switch ...

When cabinet real estate is limited and devices need to be powered, HDOT offers the most outlets in a 42U tall intelligent rack PDU. Our HDOT Cx Outlet combines a C13 and C19 into one flexible outlet ...

However, unlike traditional Power Distribution Units (PDUs), an iPDU goes beyond basic power delivery by incorporating intelligent features and network connectivity, allowing for real-time monitoring, ...

Our innovative power distribution units and rack PDUs not only maintain power, but they also enable us to support you in any challenges your IT infrastructure might face.

Based on the current status of the development of power distribution cabinet, as well as the current intelligent power network technology and intelligent equipm
