

Syrian Cold Aisle Cabinet Accessories

Want an easy way to improve cooling efficiency in your data center or server room? Eaton's SmartRack Aisle Containment System is an easy-to-assemble structure designed to keep hot and cool air ...

We provide customized solutions for data center facility airflow management needs. Our accessories accommodate hot aisle containment as well as cold aisle containment to create a total aisle ...

Ceilings span the gap across the top of cabinets in cold aisle containment. They keep cold and hot air from mixing and are available in several styles to best suit your application.

Following a collaborative, customer-driven approach, we provide the best containment options for each project. Whether ceiling hung or integrated with aisle structure, our containment solutions are ...

Simply install a blanking panel until you're ready to roll your next VR cabinet in. When deploying different height cabinets, simply use one of our optional height adapters to fill the gap.

We will work closely with your team to design a system that includes vertical panels, cabinet brackets, and end-of-row doors tailored to your specific facility.

Heavy-Duty Steel Frame Supports Tripp Lite's Aisle Containment System Two SmartRack®; frame kits are required to create a semi-airtight aisle that keeps cold and hot air separated to increase ...

Cold aisle containment encloses the cold aisles to ensure only cold air is supplied to servers. This approach is normally used with in-row cooling and raised floors and is more common in retrofits. ...

Standard sizes fit common aisle widths and heights while custom widths and heights can be easily accommodated. Can be easily assembled directly out-of-the-box with a single hand tool; attaches ...

Our aisle containment systems are vendor agnostic, featuring innovative, transparent panels that are lightweight and easily attached horizontally or vertically to cabinets using a universal rail system.
