

Technical Support for NRZ Active Optical Modules

Prior to this, nearly all 100G optical specifications incorporated NRZ (non-return to zero), which is a two-level binary modulation format. PAM4, however, contains twice the amount of data ...

The application brings together NRZ optical measurements in a simple and easy to use application. This application is designed to minimize the computation time of waveform analysis which suits the ...

With options for a 4-channel configuration (4TX+4RX) or 12-channel half duplex (12TX or 12RX), this high-speed fiber optic module accommodates data rates of up to 56 Gbps PAM4 and is backward ...

Our active optical cable assembly portfolio provides greater cable flexibility and longer reach, as compared to both traditional passive copper solutions and emerging active copper (ACC/AEC) ...

Porrima supports multiple industry standard protocols up to 100Gbps for both single mode and multi-mode applications. It is equipped with an industry leading PAM4 digital core for optimal performance ...

QSFP-DD Interconnect System's 8-lane electrical interface transmits 28G NRZ, 56G PAM-4 and 112G PAM-4, up to 200, 400 or 800 Gbps aggregate. Backwards compatible with QSFP.

These reliable and robust QSFP28 modules support high speed bit rates up to 50Gb/s over link distances up to 40km and can be offered with a choice of 1-lane 50G PAM4 or 2-lane 25G NRZ ...

The optical module with a transmission rate of 50 Gbit/s on a single wavelength supports 50GE, 200GE, and 400GE interfaces. The following table lists the parameters for the 50G, 200GE, and 400GE ...

On-board optical transceiver solutions designed and manufactured by Amphenol AOP in Berlin, Germany.
