

# The building's electrical distribution box has no ground wire

In AC power we wire both sides of the circuit - supply and return - as ...

Confusion often arises when connecting the neutral and ground conductors within a breaker box, as their proper handling depends entirely on the panel's location within the electrical ...

In AC power we wire both sides of the circuit - supply and return - as if they are hot wires (because, sometimes neutral is hot! Not supposed to happen but it does, so we build for it). ...

It's a self grounding device (meaning if the box is screwed into any grounded box, ...

If you find there is no ground wire in your electrical system, consider replacing outdated two-prong outlets, installing Ground Fault Circuit Interrupters (GFCIs), or exploring grounding through metal ...

If your electrical box does not include the ground-connecting screw you can either buy and use a green ground 3/8" x 10-32 threaded grounding screw from your electrical supplier or you ...

If you've ever found yourself scratching your head over whether that metal door on your distribution cabinet really needs a grounding wire, you're not alone. In factories, construction sites, ...

I just ran across this today and the customer has a 60 amp 3 wire sub panel to a garage with no ground, but has a ground rod and a 6 solid and no bonding screw.

No neutral conductor need have a greater ampacity than either the phase conductor which would supply the ground current, or the maximum current which can flow through the neutral conductor to the ...

It's a self grounding device (meaning if the box is screwed into any grounded box, the device will be grounded) so you could just cap that device ground wire off with a wire nut.

This article delves into the critical aspects of addressing the lack of a ground wire in electrical systems, providing valuable insights and practical guidance to help individuals tackle this ...

If you've ever wondered: "Do I need to ground every electrical box?" or "What happens if there's no ground wire in the box?" -- this video is for you.
