

Wire Winding Machine Distribution Box

The production of distribution transformers and heavy coils, as well as the production of simple to complicated multi-chamber coils, trapezoidal windings and asymmetrical windings. The production of ...

This production line is equipment for production of distribution boxes. The strip coil to be processed is manually placed on the uncoiler, and then corrected and tensioned.

Find your wire winding machine easily amongst the 33 products from the leading brands (Kabelmat Wickeltechnik, Vetter, BETTERTECH, ...) on DirectIndustry, the industry specialist for your ...

Broomfield designs and manufactures precision coil and wire winding machines for electric motors, transformers, and industrial applications. Engineered for accuracy, durability, and automated control ...

The Broomfield 600 coil winding machine offers four speed and torque ranges, making it a popular choice for manufacturing distribution transformer coils due to its heavy-duty design and versatility.

Wire winding and tying machine supports the above machine length measuring, cutting, and winding. We also have many wire pre-feeding machines to work together.

Shop our distribution machines for reliable power solutions. Find high-quality transformer coil winding machines and switchgear for efficient energy distribution.

Adopting German technology and transmitting through the turbine box, the torque is large, and the box can be moved easily and smoothly with only one handle, which saves time and effort and ensures ...

Each stored wire size is ready for immediate use on every winding job, without wasting any time in the handling of buckets or looking for the desired wire size.

Upgrade to durable, high-quality coil winders with automatic features, intuitive controls, and reliable performance for motor coils, guitar pickups, and more.
