

Wire saw machine bridge

Wire sawing is cost effective for cutting large sections of heavily reinforced concrete such as bridge sections, machine bases, and piers. No concrete structure is too large to cut with a wire saw.

LEILI wire saw has excellent formula design, thoughtful customized service and high quality manufacturing process and equipment, So as to ensure ...

LEILI wire saw has excellent formula design, thoughtful customized service and high quality manufacturing process and equipment, So as to ensure the wire saw cutting efficiency and ...

Fili Electric construction wire saw machines are widely used in construction demolition, metro and bridge, etc. This product is equipped with a custom high-power motor for powerful power and a ...

In complex concrete cutting projects, YG's new 600TM concrete rope saw machine performs well, especially suitable for cutting bridges, tunnels, large infrastructure and underwater concrete structures.

High-frequency concrete wire saws achieve precise, low-noise cutting. Suitable for bridge and dam renovations and drilling in sensitive areas.

In bridge decommissioning, renovation, or modification projects, the ability to make precise cuts without compromising adjacent structures is invaluable. The MosCut Wire Rope Saw Machine provides this ...

Powered by a stable hydraulic drive, the diamond rope ensures continuous cutting motion for bridge deck removal, tunnel renovation, marine foundation segmentation, and quarry stone processing.

Fili Electric construction wire saw machines are widely used in construction ...

Designed for demanding concrete cutting applications, the Skystone wire saw offers powerful performance, precision, and stability. Ideal for cutting reinforced concrete in bridges, tunnels, ...

Functions and projects well suited for Hi-Tech Wire Sawing include: Bridge sections. Machine bases. Steel encased concrete. Large slabs of reinforced concrete. Straight smooth finished opening in ...

See how Mactech used a 30-inch diamond wire saw to cut 106 reinforced concrete bridge piles... fast, clean, and just above the mud line.
