

A working title or definition is one which you use when starting to make or do something, but which you are likely to change or improve. His working title for the script was "Trust the People".

This article provides an in-depth exploration of the instrumentation of a fluorescence spectrophotometer, explaining its working principles, and elaborates on its wide-ranging applications ...

Learn what a fluorescence spectrophotometer is and how it works by measuring light emission, not absorbance. Discover its principle, key parts, and high-sensitivity applications.

It measures the intensity of fluorescence at different wavelength and gives fluorescence spectrum. This spectrum is used for identification and ...

Learn what a fluorescence spectrophotometer is and how it works by measuring light emission, not absorbance. Discover its principle, key parts, and high-sensitivity ...

Simple fluorescence spectrometers have a means of analysing the spectral distribution of the light emitted from the sample, the fluorescence emission spectrum, which may be by means of either a ...

Noun working (countable and uncountable, plural workings) (usually in the plural) Operation; action. Method of operation. (arithmetic) The incidental or subsidiary calculations ...

The fluorescence spectrophotometer is a powerful analytical instrument that leverages the emission of light from excited molecules to detect and quantify substances with great sensitivity and ...

OverviewInstrumentationTheoryAnalysis of dataTryptophan fluorescenceTime-resolved fluorescent proteinsApplicationsExternal linksTwo general types of instruments exist: filter fluorometers that use filters to isolate the incident light and fluorescent light and spectrofluorometers that use diffraction grating monochromators to isolate the incident light and fluorescent light. Both types use the following scheme: the light from an excitation source passes through a filter or monochromator, and strikes the sample. A proportion of the incide...

Fluorescence spectroscopy analyzes fluorescence from a molecule based on its fluorescent properties. Fluorescence is a type of luminescence caused by photons exciting a molecule, raising it to an ...

Serving as a basis or guide for further work: a working hypothesis. 1. The manner in which something operates or functions: the workings of the mind. 2. The parts of a mine or quarry that have been or ...

Working Principle of Fluorescence Spectrometer

working adjective [not gradable] (PERFORMING AS INTENDED) performing as intended and doing what it is supposed to do:

When measuring fluorescence spectra, the wavelength of the excitation light is kept constant, preferably at a wavelength of high absorption, and the emission monochromator scans the spectrum.

Working definition: Having a paying job; employed.

Fluorescence spectroscopy is an analytical method used to examine the fluorescent characteristics of molecular compounds. It involves measuring the light that certain substances emit after absorbing ...

Typically, chemicals in solution are the ones being measured by fluorescence. In fluorescence spectroscopy, a cuvette holding a solution is passed through a beam of light having a ...
